**1960 Mario**

**Does the quarry area  
show 2 classic  
landslip scars or old  
working areas to east  
and north-west.**

**Q = quarry**

**QW = quarry waste?**

**Richard Higgins thinks  
the marked area is of  
a different material  
to the rest of the field.  
It is poor quality pasture  
and likely to be dumped  
material, possibly quarry  
overburden.**
